

Flashlight Constellation Wheel

Activity Overview:

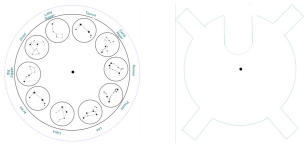

Welcome to the constellation wheel stem project! In this fun and educational activity, you'll create a spinning wheel featuring various constellations. Not only is this project a great way to learn about different star patterns, but it also makes for a beautiful decoration or teaching aid. With the addition of a flashlight, you can bring your constellations to life by making them glow in the dark. Let's get started!

What you need:

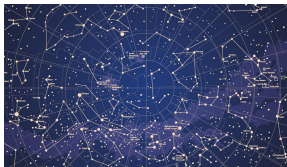

- Stiff cardboard or cardstock
 - Brass fastener
 - Constellation templates
 - Scissors
- Pin
 - Flashlight

Instructions:

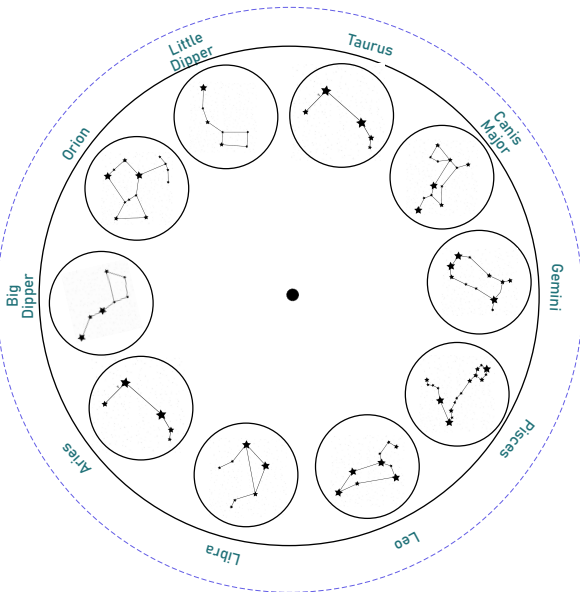

1. Print and cut on the dotted line of constellation template wheel.

2. Use a pin to punch through the Marked Stars on the printed template.
3. Pierce the brass fastener through the centre of the wheel and constellation template.
4. Test out your wheel with a flashlight in a dark room!
